

Hello All,

Greetings from Dallas, TX. We have been working with Andrew and the CBAC to reach people with the Gospel, and want to offer our service up to each one of you. Some of you may remember us from Oasis back in August, but we would love to catch you up on our free resource [Searchable.Church](#).

Our main objective is that when people turn to the internet and Google to search for answers, we can help the church be a resource. We are able to do this by creating a gospel presentation page on everyone of our church partner's website. This page features a gospel presentation video along with an opportunity for seekers to respond or ask questions through email. When people use Google to search terms like, "How to become a Christian" or "who is Jesus" they will have the opportunity to visit your church page. We also take it one step further and target searches revolving around life issues like marriage, depression/anxiety, and meaning of life. Our ultimate goal is to work together as the church to saturate online searches with the Gospel.

These visitors to your site may be looking for answers to a specific question, wrestling with life issues, or just looking for prayer. Our hope is that as the church you will be able to enter into conversations with these seekers, continue to present them with the gospel, and move them down the path into discipleship.

We are able to run these ads using a grant Google offers to all Non-profits. Google for Non-profits offers a free advertising credit of \$10,000 a month to each church. We will help you apply to their nonprofits program as well as create and manage these ads through Google. To get started the first step will be to register as a non-profit with [techsoupcanada.ca](http://techsoupcanada.ca). After that just send us an email at [hello@searchable.church](mailto:hello@searchable.church) letting us know you are ready to get started or sign up at [Searchable.Church](#). If you have more questions there is an in depth overview available at [Searchable.church/live-overview](#).

Thank you so much for you interest in partnering with us so we can share the gospel together.

Jason Deutsch
